Luxury Private Cinemas

PRIVATE CINEMAS FOR RESIDENCES AND YACHTS

A private cinema, designed as part of the architecture.

We plan and build private cinemas for residences and yachts. Interior design, acoustics, picture, sound, lighting, control and building services are developed together from the start.

Design. Planning. Installation. Calibration. Service.

ONE SPECIALIST TEAM. ONE POINT OF RESPONSIBILITY.

Die Zwei - Heimkino GmbH

+49 (40) 23855400 | diezwei-heimkino.de

When the movie starts, the room should disappear.

EVERYTHING ELSE IS ENGINEERING.

One team, responsible for the whole room.

The design, construction and final performance are coordinated as a single project.

01 Room & System Design

Interior design, seating, sightlines, acoustics, sound, projection, lighting, control, ventilation and equipment spaces - planned together.

02 Planning & Construction

Detailed drawings and specifications, trade coordination, installation, project management and quality control.

03 Calibration & Handover

Audio and video calibration, final tuning, system documentation and practical instruction for owners and staff.

04 Service & Support

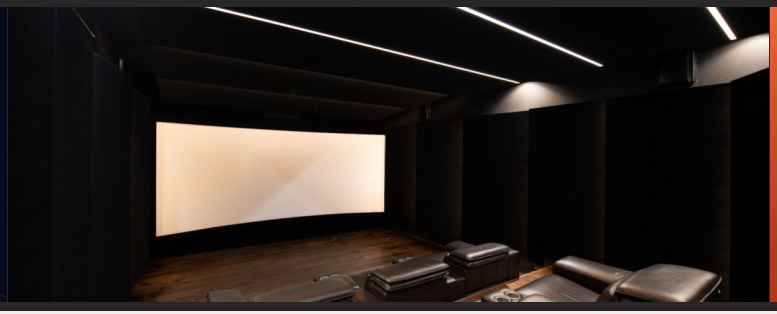

Remote monitoring, remote support and on-site service. Faults can often be identified before they affect use.

Good cinema design hides the complexity.

We work only on a limited number of projects to ensure our high quality standards and remain responsible long after handover.

CEDIA AWARD WINNER 2025 - BEST HOME CINEMA EMEA
Crestron Award 2021 for Best Custom Programming

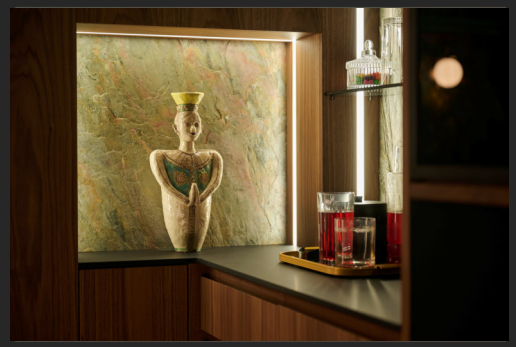

Portfolio

Selected private cinema projects.

A selection of completed residential cinemas, media rooms and support spaces. Each project is planned, built and commissioned by Die Zwei, with equal attention to architecture, performance and ease of use.

RECOGNITION

Independent design. Proven results.
Award-winning outcomes.
